IMMERSION DRIPPER

RECIPE

africablack®

COFFEE * ROASTERY

18g Coffee

350g water

With the dripper in the open position rinse the paper filter. Allow the water to heat the brewing receptacle and then discard the water.

Close the dripper, add 18g ground coffee (between drip and cupping grind), zero scale.

Start the timer, pour enough water to wet the grounds, and let bloom.

Pour vigorously hitting all around the sides in order to help form a nice flat bed and stop at 300g

At 2 minutes, open the dripper and give a mild stir making sure to agitate around the edges of the slurry

It should take 1 – 1.5 minutes to finish brewing
